

## Interactive Meetings – Anytime, Anywhere

---

### Powerful Presentations

The StarBoard T-17SXL provides the full functionality of an interactive whiteboard through a 17-inch LCD pen display. It lets you control computer applications and write digital notes on the display, while your audience views the same notes projected onto a large screen.

### Maximize Productivity

Demonstrate concepts the effective way by utilizing a library of interactive tools that can turn static presentations into dynamic meetings. Mark up web sites, documents, and multi-media files with digital inks to illustrate your point and capture your audience's feedback. Then, reorganize your notes and recall them later to share with colleagues.

### Flexibility

Conveniently placed on a desktop or lectern, the bright 17" display provides a clear SXGA image that works well with high-resolution LCD projectors. The tilt adjustable stand allows users to angle the display for both comfort and accessibility.

“There is no better product on the market for improving instructional, entertainment or facilitation venues than the Hitachi T-17SXL.”

– Jay Wickman, Training Officer, CA

## Features

- 1 Function buttons
- 2 Page up/page down
- 3 Power button
- 4 LCD/Active area
- 5 Speakers

## Dimensions

MODEL	ACTIVE AREA
T-17SXL	17" (diagonal)

## Key Benefits
