

## Start Wide, Expand, and Never Look Back

### Interactive Presentations

The StarBoard T-19WX provides the full functionality of an interactive whiteboard through a 19-inch wide screen pen display. It lets you control computer applications and write digital notes on the display, while your audience views the same notes projected onto a large screen.

### Collaborate and Share

Transform meetings and brainstorming sessions into creative opportunities to inspire collaboration. Use your stylus to easily navigate through documents, websites, or annotate over images and templates to capture your team's feedback. Create a digital record of the discussion and email a copy to all attendees.

### Designed for Business

The T-19WX integrates seamlessly into any existing presentation style with its attractive size and low-profile design. Conveniently placed on a desktop or lectern, the bright 19" display provides more working space and a clear image with WXGA+ resolution that works well with high-resolution LCD projectors.

“Hitachi will continue to promote environmental conservation through our technologies.”
